AXA Selection Strategic Balanced

a Sub-Fund of **Architas Multi-Manager Global Funds Unit Trust Retail Class R (EUR) Units** (IE00B8HW7D66)

This Fund is managed by Architas Multi-Manager Europe Limited, part of the AXA Group

Objectives and Investment Policy

The aim of the Fund is to maximise the value of your investment.

The Fund is an actively managed fund of funds. The fund pursues its aim mainly by investing in other funds (underlying funds). Underlying funds are selected principally on the basis of our assessment of their consistency of investment returns, the risks related to the strategy, the strength of the investment process and the degree to which they complement each other within the portfolio.

The underlying funds will have a balanced range of underlying investments which typically invest in tradable debt (fixed-income securities), shares, and share-related securities (bank certificates representing a specified number of shares in a company). The underlying funds may also invest in tradable debt which can be easily converted into cash (money-market

instruments) and other asset classes including commodities and financial contracts (derivatives). The Fund is not subject to any limitation on the proportion of its net assets that may be invested in any one country, region, sector or asset class.

The Fund may also invest up to 20% directly in assets including shares, tradable debt issued by companies, governments and other institutions and money-market instruments.

The Fund does not have a benchmark.

We will automatically include income from the Fund's investments in the value of your units.

You may sell your investment on a daily basis.

The base currency of the Fund is EUR.

Risk and Reward Profile

This risk indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The lowest category does not mean risk free.

The risk and reward category may shift over time and is not guaranteed.

Your investment in the Fund is not guaranteed. The Fund is invested in financial assets and instruments and uses financial techniques that are subject to levels of variation, that may result in gains or losses.

Funds of category 4 have shown in the past a low to medium volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 4 might be subject to low to medium price fluctuations based on the historical volatility observed.

The following are additional risks not covered by the risk and reward category:

Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Credit Risk - Bonds: The Fund may invest in bonds which provide a fixed or variable return and which are a form of loan, the value of which depends on the issuer being able to make its payments. There is a risk that the issuer will fail to do so. Although the Fund generally invests in bonds with high ratings, a high rating does not guarantee an issuer's ability to pay.

Currency Risk: The Fund invests in overseas markets and the value of the Fund may fall or rise as a result of changes in exchange rates.

Derivatives Risk: The Fund may use derivatives in an attempt to reduce risk (hedging) or for investment purposes. It may be that the use of derivatives causes share prices to fluctuate which may in turn result in the Fund and your investment suffering a loss.

Fund of Funds - Liquidity Risk: The Fund invests in other funds and its liquidity depends upon the liquidity of those underlying funds. If underlying funds suspend or defer the payment of redemption proceeds, the Fund's ability to meet redemption requests may also be affected.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.
